Significantly contributed in the following important areas & rare works:

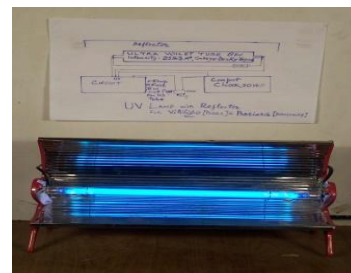

1. **Pharmacovigilance:** Worked extensively in the field of Pharmacovigilance, in which I emphasized the rationality of using Unani drugs to prevent ADRs in correlation with the theory of temperaments. I published a profound research paper entitled "Importance of pharmacovigilance in Unani system of medicine", which was published in the Indian Journal of Pharmacology [2008 Feb.; 40(Suppl. 1): S17–S20] and explained many important classical details about Pharmacovigilance from ancient Unani scholars. I also explained the importance of Pharmacovigilance in the Unani System of Medicine and the relationship between Pharmacovigilance and Unani Medicine. I am a founder life member of the Society of Pharmacovigilance India (SoPI).

2. **Pharmacology:** I have Determined various pharmacological activities of herbal drugs like "*Habb-e-qilqil*" (*Cardiospermum helicacabum* L.), "*Berg-e-Arusa*" (*Adhatoda vasica* L.) and "*Shoneez*" (*Nigella sativa* L.) for their hypoglycaemic activities. Effects on the sexual behaviour of rats of *Syzygium aromaticum* L. and *Myristica fragrans* Houtt. (nutmeg). I searched for an anti-inflammatory and antihistaminic study on Unani Eye drop formulation. I also screened various traditional herbs for various pharmacological activities. I am also a Life Member of the Pharmacological Society of India.
3. **Latif-Sukul Syndrome (Iris heterochromic vitiligo-A syndrome):** This is the first discerned case in Asia, reported and coined by me. It is a rare Autosomal dominant congenital disease. This syndrome indicates that vitiligo or such pigmentary disease may be hereditary and genetic, not to say acquired only. It was also presented at the IX Biennial Conference of Dermatology, Lahore (Pakistan), 1997.
 
4. **Melanonychia (Nail Pigmentation):** This is the first case reported as a rare unwanted effect of Atrilal (*Ammi majos* Linn.) In reference to the treatment of Vitiligo reported by me.
 
5. **Standardization of Unani Drugs:** Worked very efficaciously in this field, by standardizing different single and compound Unani formulations. Additionally, I have authored several valuable articles published in various journals discussing the current status of Unani Medicine and the method of standardization and related topics.
6. **Microbiology:** During my tenure as chairperson, I established a microbiology laboratory to assess the microbial load, a compulsory procedure as per the regulations of the Indian government, and to evaluate the antimicrobial properties of Unani drugs. Additionally, I authored a significant book titled "Unani Herbal Antibiotics," which garnered popularity among academics and students by releasing two editions. Subsequently, I initiated hands-on training sessions for the P.G. students of Unani Medicine, focusing on exploring herbal drugs for their antimicrobial activities. I conducted screenings to evaluate the antimicrobial properties of Unani drugs against MRSA and various microbial strains, including *Swertia chirayita*, *Coptis teeta*, *Viola odorata*, *Achyranthes aspera*, *Abutilon indicum*, *Laoq Sapistan Khayar Shambari*, *Glycyrrhiza glabra*, *Nepeta bracteata*, *Cassia fistula*, *Adiantum capillus veneris*, *Usnea Longissima*, *Lichen*, among others. I have also screened certain chemical compounds for their antimicrobial properties.

7. **Designed an instrument for treatment of skin diseases:** UV Lamp comprising of UV-C light for the treatment of vitiligo and Psoriasis.

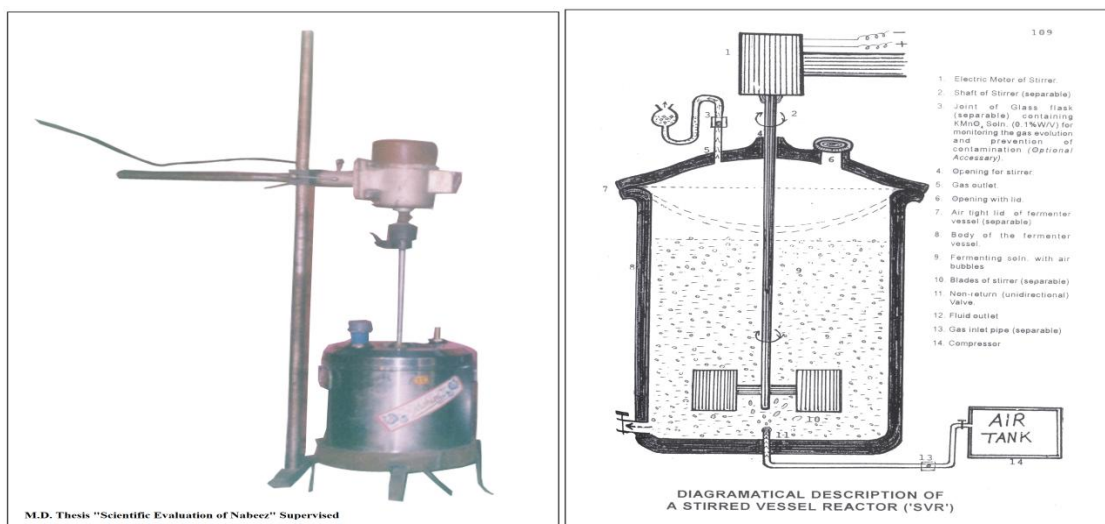

In India, it is a cheaper and handier device designed by me. Female patients can use themselves on hidden portions of their affected parts in the treatment of Vitiligo and Psoriasis.

I received the Best Paper Award for this work at the International Conference on Recent Innovations in Science, Technology, Management, and Environment held at the Indian Federation of United Nations Associations, New Delhi, on June 19, 2016.

8. **Instrument for the preparation of Nabeez [Fermented Dosage Forms]**

Nabeez is a unique dosage form of medicinal and Nutritional liquid preparation obtained by the fermentation of sweet aqueous solution of various food grains, fruits and medicinal ingredients. It is considered one of the important forms of compound drug formulation in the earlier era of Unani medicine. With the advancement of Industrial technology, the earthen pots have been replaced by larger wooden barrels/large metallic and plastic pots or stainless steel vessels taken for its manufacturing guided and designed as part of MD Thesis supervised to Dr. Ghulam Haider Shah Jafri.

Reviews of the Academic Work

- In the Bangladesh Journal of Medical Science, Volume 19, Issue 02 of April 2020, Professor Syed Ziaur Rehman has published a critical review paper. This paper focuses on the book "Huqna Therapy" by Professor Abdul Latif. The review paper not only appreciates the book but also highlights its significance in the Unani (Ilaj bit Tadbir) and Ayurveda systems of medicine. Professor Rehman suggests that all practitioners of various medical systems should consider reviving this therapy. The review paper can be found on pages 345-347 of the journal, and its DOI is <https://doi.org/10.3329/bjms.v19i2.45022>.
- The article titled The Legacy of Ibn Sina as seen by an Indian was published on Viewswall to provide insights for individuals interested in learning about the renowned scholar Ibn Sina and his connection to Uzbekistan.
